

Causal Factors in Airplane Accidents

Have pilots invented new ways to crash airplanes? Does the Wings program make a difference? Are certain aircraft prone to certain types of accidents? Is your certificate level a predictor of the type of accident you could be involved with? What type of accident has a high probability of a fatality? One thing is certain, the pilot is always the first to arrive at the scene of an accident. Highest score on pre-seminar test wins a door prize. Expect numerous aircraft in vicinity of and in traffic pattern for the airport. Plan for extra gas and go-arounds. Don't be "Fuelish".

Directions: Classroom inside main terminal building

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
